

Sell E-series convection oven

E-series • P/N 8201-11-0000

Our E-series convection oven is simplicity itself. Hard-working, highly effective and easy to use, it represents the most economic way to serve hot meals to passengers.

The straightforward, two-temperature settings and timer leave little room for error – their use requires almost no cabin crew training. Exceptionally robust and reliable, they are easy to clean and maintain while our specially developed airflow system ensures even and rapid heating. Engineered with long-life components and thoroughly tested before despatch, each oven provides...

...exceptional lifetime value.

ATLAS standard

- P/N 8201-11-0000
left-hand hinged door
 - P/N 8201-61-0000
right-hand hinged door
- also available:
- KSSU standard
 - specific airline types

proven reliability:

20,000

Over 20,000 of our classic convection ovens have entered service with the world's airlines since the launch of the 8201 model in 1987.

20 years

With a 20 year service life expectation designed into each oven, most are still flying and giving excellent service.

day in day out

All our ovens are engineered to perform day in day out, our simple design has evolved through experience, testing and a real understanding of what is required from them in service.

E-series:

Our full range of **efficient** galley inserts provides high quality performance in simple, reliable packages.

X-series:

Our range of enhanced products includes **extra** performance and features to deliver the very best.

quality assurance:

All our products receive stringent testing for air-worthiness and are assessed for performance. On-going support, including spares and repair services, is also available.
